

# **Inverter with single-phase water pump**

## Overview

---

What is a 3 phase solar pump inverter?

The 3 phase solar pump inverter is widely used in agricultural irrigation, domestic water supply, livestock watering, aquaculture, emergency water supply, and desert reclamation. 5.5 kW solar pump inverter with affordable price, AC 13A output at 3-phase, MPPT tracking technology, and real-time detection of power voltage.

Which solar water pump inverter is available online?

The 5.5kW three-phase AC 220V solar pump inverter is now available online. This solar pumping inverter integrates advanced MPPT tracking for precise voltage detection and optimal performance. The solar water pumping system supports AC and DC input, with a DC voltage range of 300V~380V and a power factor >0.99.

What is a water pump inverter?

It is a completely new inverter for water pumps, and the first residential water pump inverter solution in the Middle East and Africa. With the inverter technology, it Regulates pump speed for longer lifetime, highest and reduced maintenance costs. Over Voltage, Over Current and Over Temperature protection.

What is a E-power pump inverter?

An efficient and extremely reliable pump inverter, the E-Power is cooled by the water flowing through it. The E-Power varies your pump speed to match the demand. It is ideal for booster pump sets. Simply mounted inline (on pipe) by connecting the inbuilt 1.25" male threaded stainless steel pipe to your pipe work.

## Inverter with single-phase water pump

---

### Inverter

Inline Variable Speed Pump Inverter - Single Phase SALE!! Stock Clearance - Now LESS than Half Price! An efficient and extremely reliable pump inverter, the E-Power is cooled by the water flowing through it. The E ...
