

Is it dangerous to connect China s solar container communication station inverter to the grid

Overview

Do Chinese solar power inverters have undocumented communication devices?

However, undocumented communication devices have reportedly been found in some Chinese solar power inverters. And over the past nine months, such devices—including cellular radios—have also been found in some batteries from Chinese suppliers.

Are Chinese power inverters a threat to US energy?

In the wake of the revelation, U.S. energy officials are reassessing the risk posed by Chinese-made devices that play a critical role in the country's renewable energy infrastructure. Power inverters, produced primarily in China, are used around the world to connect solar panels and wind turbines to the power grid.

Do Chinese solar power inverters have a firewall?

While such inverters allow remote access for updates and maintenance, utility companies usually install firewalls to block direct communication back to China. However, undocumented communication devices have reportedly been found in some Chinese solar power inverters.

Did Chinese inverters have unauthorized communications equipment?

Solar Panels Cordon Press. U.S. energy officials have found "unexplained" communications equipment inside some Chinese-made inverter devices, according to a report by Reuters published Wednesday. The document reveals the presence of unauthorized and fraudulent communication devices in several Chinese-made solar power inverters.
