

# **Is the communications building a 5G base station**

## Overview

---

How many 5G base stations will China build in 2025?

China plans to construct over 4.5 million 5G base stations in 2025 while introducing additional policy and financial incentives to support industries expected to shape the next decade, the country's Ministry of Industry and Information Technology (MIIT) announced during its annual work conference.

How many 5G base stations are there in New York City?

At a press conference held on Thursday, the municipal government said the city now has 88,000 5G base stations and is working to build an optical fiber network with a communication capacity of more than 10 gigabits per second (Gbps) and develop 5G-Advanced technologies by the end of 2026.

How many 5G base stations are in Shanghai?

Currently, 37.2 percent of Shanghai's mobile phone base stations are 5G base stations, and there are 13.8 5G base stations across the city per square kilometer, both ranking first in China.

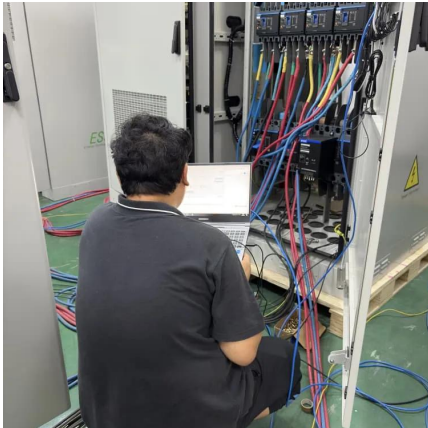

Will 5G Revolution & 6G innovation be a priority next year?

The move comes as the country charted its vision for industrial growth during a two-day work conference of the Ministry of Industry and Information Technology. With 4.19 million 5G base stations already in operation, the industry regulator said that "promoting 5G revolution and 6G innovation will be one of the priorities" next year.
