

Jakarta government s 600 million energy storage project

Overview

Will Indonesia deploy 100 GW of solar?

The Indonesian government has revealed a new initiative aiming to deploy 100 GW of solar. The distributed solar for energy self-sufficiency program encompasses 80 GW of solar that will be deployed as 1 MW solar arrays with 4 MWh of accompanying battery energy storage systems (BESS).

Will Indonesia build 100GW of solar PV & 320gwh of Bess?

The government of Indonesia has launched a programme that aims to build 100GW of solar PV and 320GWh of BESS in the coming years, mostly distributed across smaller projects in rural areas. The programme will consist of 80GW of solar PV plants and 320GWh of battery energy storage systems (BESS) across 80,000 villages.

Will 100 GW solar power plant be installed in villages?

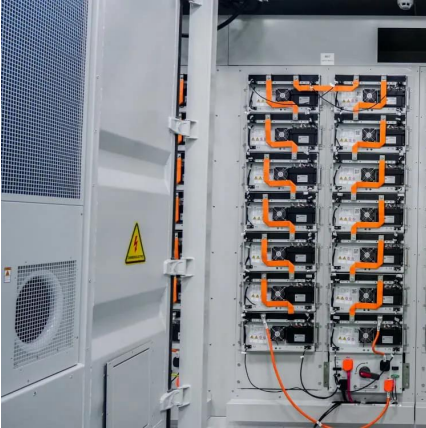

According to pv magazine, the “100 GW Solar Power Plant Plan for Village Cooperatives,” mandated by President Prabowo Subianto, will see 80 GW installed as 1 MW solar arrays paired with 4 MWh battery energy storage systems in 80,000 villages.

What is Indonesia's energy storage capacity?

Indonesia’s energy storage capacity is only 25 megawatt-hours (MWh), most of which comes from private initiatives. His Muhammad Bintang, Author of Powering the Future 2024 and Coordinator of IESR’s Energy and Electricity Resources Research Group, said that Indonesia does not yet have a large-scale energy storage system.
