Jamaica Energy Saving New Energy solar Energy Storage

Overview

Will JPS build a solar power plant in Jamaica?

Power utility Jamaica Public Service Company, JPS, is investing US\$300 million to construct Jamaica's largest solar power plant and a battery storage facility, starting this month. The renewable energy facility will replace JPS's aged Hunts Bay.

Why is energy storage important in Jamaica?

Jamaica is committed to reducing its dependence on imported fossil fuels. The country's National Energy Policy sets an ambitious target: 50% of electricity from renewable sources by 2037. Energy storage plays a critical role in achieving this target. Key policy support includes:.

Could solar power be a big deal in Jamaica?

With over 300 sunny days a year, solar energy holds immense potential. The expansion of rooftop solar, supported by net billing policies, could empower households and businesses to contribute to the grid. Jamaica's consistent trade winds offer an ongoing opportunity to expand wind farms, particularly in areas like Manchester and St. Elizabeth.

Why does Jamaica need a new energy system?

Jamaica is at a pivotal point in its energy journey. For decades, the country has relied heavily on imported fossil fuels to power its homes and industries. This dependence has left the economy vulnerable to global oil price fluctuations and has contributed to high electricity costs. But the tide is turning.
