

GETON CONTAINERS

Korea solar Glass Greenhouse Customization

Overview

What is the future of greenhouse horticulture?

Many have turned to greenhouse farming techniques to ensure food quality and output. The blooming greenhouse horticulture market is expected to reach \$50 billion by 2028. At the same time, energy costs, grid constraints and public policy are fueling growth in on-site solar generation.

What is a greenhouse integrated PV (gipv) module?

Get in touch! Traditional greenhouses rely on external fossil fuel derived energy sources to power lighting, heating and forced cooling. Specially designed BiPV solar glass modules for greenhouses, Heliene's Greenhouse Integrated PV (GiPV) modules offer a sustainable alternative with no additional racking or support required.

How big is the greenhouse horticulture market?

The blooming greenhouse horticulture market is expected to reach \$50 billion by 2028. At the same time, energy costs, grid constraints and public policy are fueling growth in on-site solar generation. Ready to go green and grow more with Heliene's agrivoltaic modules?

Korea solar Glass Greenhouse Customization

[Custom High-Quality glass greenhouse with solar panels](#)

When it comes to sustainable gardening solutions, our glass greenhouse with solar panels stands out for its high quality and innovative design. By integrating solar energy, this ...
