

# **Kuala Lumpur Portable Power Bank Communication BESS**

## Overview

---

Is Bess Malaysia's first utility-scale energy project?

Leader Energy said the project is also Malaysia's first utility-scale BESS connected to an operational LSS farm. BESS alleviates intermittency challenges by enabling excess energy from the LSS farm to be stored and discharged as required for a stable and uninterrupted output of energy.

Can Malaysia emerge as a key player in the Bess industry?

With supportive policies and rich renewable resources, Malaysia can emerge as a significant player in the BESS industry. A central pillar of MyRER's post-2025 strategy involves prioritising cost-effective energy storage solutions, including battery storage.

What are the benefits of Bess in Malaysia?

The transformative power of BESS in Malaysia extends beyond environmental benefits. It catalyses advancements in smart grid technology and energy management systems, promoting efficient energy usage and emissions reduction.

Why should you invest in Bess in Malaysia?

BESS offers not only environmental benefits but also lucrative investment opportunities. As Malaysia works towards reducing its carbon footprint and meeting green energy targets, BESS provides a reliable, efficient solution to store and distribute green energy from intermittent renewable sources such as solar, biomass, biogas, and hydropower.
