

# Kyrgyzstan energy storage charging station subsidies

## Overview

---

How much CO2 does Kyrgyzstan produce?

higher than the global average. The Kyrgyzstan energy sector contributes to roughly 60%, 9.1 MT of CO2, of its total GHG emissions, where the residential energy consumption and the production of heat & electricity account for over 70.

Does Kyrgyzstan have a battery recycling system?

“Besides, Kyrgyzstan does not have a proper battery recycling system. Watch battery recycling is environmentally unfriendly, and batteries are simply thrown away and go into the environment and cause much damage,” said Vlad Ushakov.

Are hybrid vehicles a solution to a shortage of electricity in Kyrgyzstan?

According to economist Marat Musuraliev, given the shortage of electricity in Kyrgyzstan, hybrid vehicles may become the most efficient solution to a problem of emission abatement in the environment from motor transport. The advantage of hybrid vehicles is that they may be fuelled with regular gasoline as well.

Will Kyrgyzstan popularise electric vehicles?

According to the representative of the Union, there is a prospect for popularisation of electric vehicles among Kyrgyzstanis. The key factors contributing to it are state support, including tax benefits and subsidies for a purchase of electric vehicles, as well as the development of the charging station infrastructure.
