

Laos new energy charging power supply

Overview

How long does it take to charge an EV in Laos?

The company's fast-charging stations deliver power at 120-240 kW, allowing EVs to fully charge in just 20-30 minutes. Through the LOCA EV app, users can locate and navigate to charging stations nationwide, view real-time usage status, and ensure worry-free travel from Laos' northernmost to southernmost points.

How many fast-charging stations in Laos in 2024?

LOCA, a leader in electric vehicle (EV) infrastructure, has achieved a significant milestone by installing 40 fast-charging stations across Laos in 2024.

How much does electricity cost in Laos?

To its credit, state-run electricity company Electricité du Laos (EDL) is trying to encourage more solar power development by offering a tariff rate of USD 0.08 per kilowatt-hour (kWh). That's higher than the rate for hydropower-generated electricity, which ranges from USD 0.05 to 0.06 per kWh.

Are renewables the cheapest form of power in Laos?

Notably, renewables are now the cheapest form of power, offering Laos a less carbon-intensive solution over new coal-fired power production. Amid climbing fossil fuel prices, global investments in renewables in 2021 saved USD 55 billion in global energy generation costs in 2022.
