

GETON CONTAINERS

Large-capacity mobile energy storage containers for wastewater treatment plants

Overview

What is containerized mobile wastewater treatment plant?

Containerized mobile wastewater treatment plant is the name given to the systems that work with the plug and play principle by mounting all the equipment in the factory in standard iso containers or specially produced containers.

How much energy does a containerized wastewater treatment plant use?

No planning or buildings are required to operate a containerized wastewater treatment plant - the plant simply needs to be placed on a solid base. This saves costs in advance, and the system is also highly efficient during operation: a 20-foot container only needs 13 kWh/d. Container.One, Container.One+, Container.Pro and Container.Xtra.

What are mobile wastewater treatment and containerized sewage systems?

Mobile wastewater treatment and containerized sewage systems can be used in a very wide range of applications. They can be used for short term, mobile wastewater treatment where portable solutions are needed. But they can also be used for long term, fixed applications. They are specifically suited to applications such as:.

What is a water treatment plant in container?

A water treatment plant in container is a complete solution, assembled and tested off-site at our factory. The solution is complete with all internal piping and wiring factory-built. This makes the plant ready for use when supplied, which financially can be an advantage, also in relation to the reduced amount of time used for deployment.
