

# **Latvian container power generation equipment price**

## Overview

---

What is the power market like in Latvijas?

The power market is dominated by Latvenergo, a public utility. Following Latvijas Gaze's unbundling, gas transmission & storage operations moved to Conexus Grid while distribution were transferred to Gaso. The country has a strong power interconnection with neighbouring countries.

Why did Latvijas Gaze move to Conexus grid?

Following Latvijas Gaze's unbundling, gas transmission & storage operations moved to Conexus Grid while distribution were transferred to Gaso. The country has a strong power interconnection with neighbouring countries. The share of hydropower in the power mix is fluctuating significantly (between 33% and 60% since 2010).

How will Lithuania boost its power supply?

The country is counting on the upgrade of its hydropower plants and on new electricity interconnections to boost its power supply. The capacity of the Inčukalns gas storage facility will be raised in 2025 and new gas pipelines will be built to Lithuania and Estonia.

What happened to Latvijas gas?

Latvijas Gaze was unbundled in 2017: its transmission and storage operations were transferred to a new company named Conexus Baltic Grid, while gas distribution and sales operations were transferred to a new company called Gaso. All gas is imported.
