

# Libreville Portable Power Agent

## Overview

---

What is a portable power station & a home energy storage battery?

Product portfolio includes portable power stations (300W-2000W) for on-the-go applications and home energy storage batteries (5kWh-30kWh) for residential use, providing solutions that scale with your customers' diverse energy needs. Perfect for field work, outdoor events, and mobile operations. Home energy independence and backup power solutions.

Should you buy a portable power station?

The term "portable" is stretching it sometimes. Batteries are heavy. The larger-capacity power stations are typically on wheels and have telescopic handles, and they are still tough to cart around. If you're looking for something you can actually carry on foot for a distance, you may need to temper your expectations on capacity.

What is the best portable power station?

By far the most portable power station in our guide, the EcoFlow River 2 Pro weighs just 17 pounds and has a large handle along the back. The LiFeP04 battery inside is good for 768 watt-hours, and I managed to squeeze a little more out of it in my tests. The ports are great for camping trips, with everything you need to charge small gadgets.

What can a portable power station charge?

All portable power stations can charge up small gadgets like phones and laptops or be used to power lighting. Most can handle small appliances like mini-fridges or TVs. If you want to use power tools, an AC unit, or in the UK, a kettle, you need to be able to draw thousands of watts.
