

Luanda solar Panel Industry

Overview

Can Angola develop a photovoltaic solar energy industrial chain?

Sonangol, Angola's state oil company, has signed a memorandum of understanding with the Chinese firm Qinghai Lihao Clean Energy to establish a partnership aimed at developing a photovoltaic solar energy industrial chain in Angola. The agreement focuses on the production of solar panels using locally sourced quartz ore as the primary raw material.

Who is tasked with the construction of the Angola solar energy project?

Clean energy firm MCA Group has been tasked with the construction of the projects. An agreement for the provision of \$900 million in funding to support the implementation of the Angola Solar Energy Project was reached between Angola's Ministry of Energy and Water and the U.S. Export-Import Bank in June 2023.

How many MW of solar power will be installed in Angola?

The projects will be installed in the Moxico, Lunda Norte, Lunda Sul, Bie, and Malanje provinces, adding 296 MW of solar capacity and 719 MWh of battery energy storage system to the Angolan grid. The facilities will provide electricity to power one million consumers. Clean energy firm MCA Group has been tasked with the construction of the projects.

How will Angola's new solar power plant affect the environment?

The solar facility will mitigate the emissions of 224,000 tons of carbon dioxide while providing employment to 600 people. Developed in phases, the facility will be operational for 20 years and falls in line with efforts by Angola to generate 500 MW of renewable energy capacity by 2025.
