

GETON CONTAINERS

Mobile Solar-Powered Containerized Data Centers in Phnom Penh

Overview

How big is Cambodia's data centre capacity?

While there was initial market hesitation to transition from traditional in-house data centres to external colocation facilities, the financial and banking sectors have embraced this shift, prioritising data security and customer protection. The current operational data centre capacity in Cambodia is estimated at around 7MW, supplying the market.

Who are the key players in data centre development in Phnom Penh?

These efforts have spurred the emergence of key players in data centre development, such as Chaktomuk (CDC), ByteDC, and Daun Penh (DPDC) in Phnom Penh, who are shaping and pioneering commercial data centre developments.

Is the Cambodian data centre sector entering a phase of expansion?

A sharp rise occurred in 2022, culminating in a peak in 2023, highlighting rapid growth in data centre services. This surge reflects the entry of key operators such as CDC, ByteDC and DPDC into the market. These developments and trends suggest that the Cambodian data centre sector may now be entering a phase of expansion.
