

# **Nano liquid flow solar container battery**

## Overview

---

Could a water-based 'flow battery' transform home solar energy?

Researchers in Australia have created a new kind of water-based “flow battery” that could transform how households store rooftop solar energy. Credit: Stock Monash scientists designed a fast, safe liquid battery for home solar. The system could outperform expensive lithium-ion options.

Could a water-based battery outperform a lithium-ion Solar System?

Follow us on Google and Google News. Monash scientists designed a fast, safe liquid battery for home solar. The system could outperform expensive lithium-ion options. Engineers have created a new water-based battery designed to make rooftop solar storage in Australian homes safer, more affordable, and more efficient.

Why are flow batteries limited to large-scale energy storage?

Although flow batteries have existed for decades, they have mostly been limited to large-scale energy storage because of their bulk and relatively slow charging times.

How much does a 'flow battery' cost?

This next-generation “flow battery” paves the way for compact, high-performance energy systems suitable for households and is projected to cost far less than today’s lithium-ion setups, which are priced around \$10,000.
