

**GETON CONTAINERS**

# **Nassau Solar Power Generation Electricity System**

## Overview

---

What is the Bahamas national energy policy?

The latest release of The Bahamas National Energy Policy documents the country's plans to implement renewable energy generation. This will introduce net-metering, which is the recording of energy flows in both directions. As the Bahamas has close to six daily peak sun hours. Solar Power can offset a significant part of your power bill.

Does the Bahamas need a solar power plant?

The need to protect the tourism industry is an added incentive. In 2023, the Bahamas opened the first of two solar plants in Grand Bahama. The two solar plants are expected to cut more than 5,000 tons of CO 2 emissions per year. The government pledged to generate 30 percent of the country's energy from renewable sources by 2033.

How will technology transform the Bahamas' energy system?

Advanced technologies are being integrated into the nation's energy framework to create a more resilient grid, tailored to meet the unique needs of New Providence and the Family Islands. This transformation will incorporate a variety of sustainable energy sources, including: Microgrids will play a key role in The Bahamas' energy transformation.

Does New Providence have solar power?

Solar power in New Providence is set to make a significant leap forward with the integration of Utility-Scale Solar. Under the New Energy ERA 70MW of solar power will be added and 35MW of Battery Energy Storage Systems (BESS) to the existing grid, enhancing energy reliability and reducing dependency on traditional fuel sources.
