

# **New Delhi schools use 20-foot mobile energy storage containers**

## Overview

---

What is India's 'first commercially approved' energy storage system?

The system is also India's "first commercially approved" utility-scale energy storage system that will ensure improved power supply in different south Delhi areas, covering a population of over one lakh people, according to a statement from power discom BRPL (BSES Rajdhani Power Limited).

How a 20 MW storage system will affect Delhi's power infrastructure?

Sood stated that implementing this 20 MW storage system will reduce the strain on Delhi's power infrastructure. The govt will scale up the model further, particularly in unauthorised colonies and areas with limited land availability or no existing grid.

How will Delhi's energy storage system help reduce power outages?

The government intends to replicate this model across Delhi to eliminate power outages, particularly during peak demand periods. The advanced energy storage system brings several benefits, including improved grid reliability, better power purchase efficiency, and seamless integration with renewable energy sources.

What is India's first utility-scale energy storage installation?

The project, inaugurated by Delhi Power Minister Ashish Sood, is hailed as India's first commercially approved utility-scale energy storage installation. Installed at the.
