

# New Energy Power Generation Site

## Overview

---

Is the development of the new-energy industry a gateway to the electricity Revolution?

The development of the new-energy industry is, to some extent, the gateway to the next wave of the electricity revolution. There is great global demand for renewable energy generation. To embrace the next wave of the electricity revolution, developing countries, in particular, urgently need to accelerate the development of new-energy industries.

What are China's New Energy Solutions?

This means that new energy solutions are focusing more on protecting the land, water and air quality, as well as generating power. In China, several projects are going beyond gigawatts to create more adaptive, multifunctional systems that co-evolve with nature.

Why is China building new energy projects?

The construction of new energy projects in China for grid connections and transmission continues to strengthen, further enhancing the industry's capabilities to optimize large-scale resources, a report released on Thursday said. China has set up a batch of intraprovincial and inter-provincial transmission projects last year.

What is CHN energy's new photovoltaic base project?

It was constructed in conjunction with the CHN Energy's East Ningxia 1.5 GW Composite Photovoltaic Base Project, with a planned total capacity of 200 MW/400 MWh.

## New Energy Power Generation Site
