

GETON CONTAINERS

Null-to-ground voltage standard for solar container communication stations

Overview

What is an off grid solar container unit?

Attaching to the grid can also be expensive and this can be an issue in the UK as well as Africa or Latin America. An Off Grid solar Container unit can be used in a host of applications including agriculture, mining, tourism, remote islands, widespread lighting, telecoms and rural medical centres.

Can a containerized Solar System be installed off-grid?

Off-Grid Installer have the answer with a containerized solar system from 3 kw up wards. Systems are fitted in new fully fitted containers either 20 or 40 foot depending on the size required.

Are off grid solar containers reliable?

Solar equipment is very reliable but occasionally parts may fail so there is need to monitor and solve any problems. Off Grid Solar container units guarantee security and reliability and allow the engineering team to complete installations in a few days rather than weeks.

What is the soil pressure of MV station?

The soil pressure must be 150 kN/m². The unevenness must be less than 0.25%. For convenient working on the service platform on the medium-voltage compartment and trouble-free maintenance, the provision of a level, paved surface is recommended. The weight load on each of the support feet of the MV Station is 3000 kg.
