

Off-grid photovoltaic containerized government procurement

Overview

What is the scope of work for off-grid containerized PV systems?

The scope of work shall comprise of the maintenance of all sixteen (16) off-grid containerized PV systems in all three (3) regions, for a period of two (2) years from the date of formal acceptance of the procurement contractor after approval.

Can PV plus storage be deployed cost-effectively at grid-connected sites?

Considerations for Implementing PV Plus Storage Systems at Federal Buildings and Campuses – Recent declines in lithium-ion battery costs, along with changes in net metering policies and utility rate structures, have provided opportunities for PV plus storage to be deployed cost-effectively at grid-connected sites.

Can solar photovoltaic systems survive a hurricane?

Solar Photovoltaic Systems in Hurricanes and Other Severe Weather – The U.S. Department of Energy Federal Energy Management Program is expanding its recommended design specifications to include factors and best practices for system survivability identified from 2017 hurricanes.

Can federal agencies implement microgrids at their sites?

Report explores procurement options and agreements that may be useful to federal agencies interested in implementing microgrids at their sites. The free, online REopt platform is designed to help building owners, developers, utilities, researchers, and everyday citizens understand their optimal energy solution.
