

GETON CONTAINERS

# **Off-grid solar containerized generators 60kW more powerful than traditional generators**

## Overview

---

Can a solar power station be used as a generator?

However, using one effectively is a little more complicated than many people realize. Technically, these units are electric power stations—giant battery packs, with the ports you need to plug in solar panels for charging. They can't actually harness solar power—and thus, act as a generator—unless you have both.

Can solar power be used as a generator?

Technically, these units are electric power stations—giant battery packs, with the ports you need to plug in solar panels for charging. They can't actually harness solar power—and thus, act as a generator—unless you have both. They also require more than the panel to fully charge and need to be plugged in before use.

What are the best solar generator brands?

ALLPOWERS is another one of the best solar generator brands for those looking to save money, as its cheapest kit is priced at £249. Our choice, the 2,000W power station is a good option for trips off-grid; it can charge 11 devices at a time and it's rated IP66, so it should survive strong water jets.

How long does a solar generator last?

The trusted brand claims this solar generator kit, which is part of its F1200 range, can recharge to 80% capacity in just one hour, so you won't have to wait long to top up the battery. It's also designed to last up to six times longer than other generators and survive 10 years of daily use. Buy from Bluetti (£2598.00)
