

# Oslo Energy Storage Charging Station

## Overview

---

What challenges does Oslo face with EV charging?

Despite its comprehensive EV charging network and the dominance of electric vehicles in new car sales, Oslo faces several key challenges. These include scaling infrastructure to meet rising energy demands, ensuring equitable charger access, and maintaining grid stability as electrification increases.

Is Oslo a leader in EV adoption & sustainable mobility?

September 2024 - January 2025 Supported by: EIT Urban Mobility The City of Oslo is a global leader in EV adoption and sustainable mobility, aiming for carbon neutrality by 2030. Despite its comprehensive EV charging network and the dominance of electric vehicles in new car sales, Oslo faces several key challenges.

Why is Oslo partnering with surplusmap?

Oslo's collaboration with SurplusMap is a shining example of how innovative technologies can help cities meet pressing challenges while paving the way for a sustainable future. The result is a smarter, more resilient EV charging network that not only meets today's needs but also prepares for tomorrow's growth.
