## Overview

---

Can a 12V inverter power an RV?

In RVs, 12V traditionally powers the lights and low-draw appliances such as USB charge points and compressor fridges. Both 12V and 48V power systems can support larger, more electricity-intensive appliances, such as a household kettle, when the power is converted to 240V through an inverter.

Is 48V the new kid on the block in RV power?

48V is the new kid on the block in RV power. Here's a beginner's guide to what this next-generation electrical system can bring to your next off-grid adventure. Most RVers would be familiar with 12V electrical systems, but with the growing shift towards gasless caravans and power-hungry RVs, 48V is gaining traction.

Is 48V a good power station?

If you spend large amounts of time off-grid, prefer all-electric over gas and have a penchant for Thermomix curries eaten in air-conditioned comfort with a latte chaser, 48V could be for you. Dometic PLB40 review: Is this portable power station worth the hype?

.

Should you switch to 48V power?

The biggest benefit of switching to 48V is the ability to draw more power more efficiently. This means you can live off grid more comfortably and for longer without sacrificing any mod cons. Morning cappuccino, anyone?

This is increasingly more important as today's modern caravans and motorhomes have hefty power demands.
