# **Portugal hybrid energy 5g base station progress**

## Overview

---

How many base stations in Portugal have 5G?

Since the end of the first half of 2022, ANACOM has been reporting quarterly on progress in the implementation of these latest-generation mobile communications networks. At the end of 1st quarter 2024, according to information reported by operators, there were 9,999 base stations in Portugal with 5G technology.

Will 5G be a catalyst for the smart grid in Portugal?

With the aim of leading the energy transition, E-REDES has adopted 5G as an important catalyst for the smart grid in Portugal, ensuring that E-REDES' critical installations have resilient, efficient and secure communications.

What is the density of 5G base stations in Portugal?

At the end of 1st quarter 2024, the density of 5G base stations in Portugal was one base station per 10 km<sup>2</sup> - on average, 97 5G base stations per 100,000 inhabitants.

Are 5G networks growing in Portugal?

While these indicators demonstrate the growth of 5G networks in Portugal, distribution throughout the territory has not been homogeneous, with a greater concentration of stations evident along the western coastal strip, mainly between Viana do Castelo and Setúbal, and along the southern coastal strip (Algarve).
