# Price Reduction for 40-foot Smart Photovoltaic Energy Storage Containers

Overview

Are energy storage systems reducing the cost of batteries?

The scale of the reduction suggests that in addition to the falling cost of batteries—BNEF's recent Lithium-ion Battery Price Survey found that battery pack prices fell 20% year-on-year to 2024, again the biggest drop recorded to date—energy storage system providers are working on cost reduction in other areas, Kikuma said.

Why are battery energy storage systems (Bess) costs falling?

A growing industry trend towards larger battery cell sizes and higher energy density containers is contributing significantly to falling battery energy storage system (BESS) costs.

How much does a turnkey energy storage system cost?

According to BloombergNEF's recently published Energy Storage System Cost Survey 2024, the prices of turnkey energy storage systems fell 40% year-on-year from 2023 to a global average of US$165/kWh. The research firm said this was the highest annual drop since its survey launched in 2017.

How much will a 300ah battery cost in 2025?

BNEF also asked survey participants to specify the delivery year of their systems, and through that was able to forecast an even bigger drop in 2025, to an average of US$122/kWh for DC blocks with 300Ah or bigger cells. "A lot of people are thinking about bigger battery cells.
