

# **Price of 20kW Solar-Powered Container Terminals for Australian Airports**

## Overview

---

How much does a 20kW Solar System cost in Australia?

Across Australia, a quality 20 kW array installed on a standard iron or tiled roof with no major upgrades falls between \$15 000 and \$22 000, including GST and the federal STC incentive. That headline range converts to roughly \$750 – \$1 100 per installed kilowatt. How many panels are in a 20kw solar system?

How much area is required?

.

What is a 20kW Solar System?

A 20kW solar system is a large and future-proof solar system capable of meeting the electricity needs of larger residential properties or small to medium-sized commercial businesses. A 20kW solar system is ideal for properties with significant energy demands and plenty of roof space.

Is a 20kW Solar System a good investment?

With a daily power output north of 70kWh each day depending on your location and the position of your property, a 20kW solar system has the potential to generate enough power to pay for the upfront cost and become an ROI positive investment for most businesses in a few short years. How much does a 20kW solar system cost in Australia?

.

What is a solar powered shipping container?

At SCS Australia, we create solar powered shipping containers that combine renewable energy technology with the strength and mobility of a shipping container. These self-sufficient units are ideal for powering off-grid operations, mobile businesses, events, and remote projects—all while reducing carbon

footprint and cutting energy costs.
