

# Price of single-glass solar panels and double-glass solar panels

## Overview

---

Are single glass solar panels better than double glass?

Single glass solar panels are affordable and cheaper than double glass solar panels, therefore they are available in the market easily and more in quantity than double glass panels. They also require less materials and time to be manufactured which also causes a production of wide range of single glass panels.

What are single glass solar panels?

Single glass solar panels, also known as monofacial solar panels, are the startup of steps in renewable solar energy. They are called single glass because the solar cells are packed behind the single glass technology. The reason they are called monofacial is that 'mono' means single or one and 'facial' means face.

Why are double glass solar panels called double glass panels?

Double glass solar panels are named double glass panels because they have glass on both sides which produces a little more electricity and gives more efficiency than single glass panels. The reason of this increased efficiency is because of addition of glass in the back as a replacement of polymer sheet in case of single glass solar panels.

What are the advantages of single glass solar panels?

Single glass solar panels have these following advantages: Single glass solar panels are affordable and cheaper than double glass solar panels, therefore they are available in the market easily and more in quantity than double glass panels.

## Price of single-glass solar panels and double-glass solar panels
