Procurement of a 100kW folding container for a wastewater treatment plant

Overview

What is a containerized wastewater treatment plant?

A containerized wastewater treatment plant is a wastewater treatment system that is fully integrated into a container. For uncomplicated and fast transportation, we use 10, 20 and 40-foot shipping containers in accordance with the international ISO standard for our KLARO container systems.

What is a packaged sewage treatment plant?

For small scale commercial wastewater treatment applications, we preinstall all treatment modules (processes) inside a single container. The complete treatment process including primary settlement, secondary treatment and clarification happens within the container. This type of packaged plant is ideal for temporary and mobile sewage treatment.

How many m3 of wastewater can a containerized wastewater treatment plant handle?

We have experience with containerized wastewater treatment plants for up to 1,380 PE or 207 m3 of wastewater per day. A wastewater treatment plant is only as effective and efficient as the installed system.

What is a water treatment plant in container?

A water treatment plant in container is a complete solution, assembled and tested off-site at our factory. The solution is complete with all internal piping and wiring factory-built. This makes the plant ready for use when supplied, which financially can be an advantage, also in relation to the reduced amount of time used for deployment.
