

Qatar Energy Storage Power Generation

Overview

What is Qatar energy's strategy?

It relies on several main pillars: to develop a low carbon energy department, to reduce emissions to compensate for residual emissions, and to preserve the company's leading position in the LNG sector. Qatar Energy set within its strategy several targets, such as:

How much energy does Qatar use?

Qatar's energy consumption in 2016 was 34.00 billion kilowatt-hours (kWh), which is an average of 15,056 kWh per capita. Qatar's exploration of the oil market began around 1923, when its own pearl diving market took a hit with the entry of Japan's cultivated pearls into the market.
