San Jose lithium energy storage power supply retail price

Overview

What happened to lithium-ion battery energy storage systems in November 2024?

In November 2024, the lithium-ion battery energy storage system quotation and winning bid price hit new lows again. The quotation range of lithium-ion battery energy storage systems was 0.398 - 1.395 yuan/Wh, with an average quotation of 0.56 yuan/Wh, a 16.4% decrease compared to October.

How much does a lithium ion battery cost?

The average price of lithium-ion battery packs is \$152/kWh, reflecting a 7% increase since 2021. Energy storage system costs for four-hour duration systems exceed \$300/kWh for the first time since 2017. Rising raw material prices, particularly for lithium and nickel, contribute to increased energy storage costs.

How has the lithium-ion battery price changed in 2024?

Current Market Prices According to recent data from BloombergNEF, in 2024, the global lithium-ion battery prices have seen a significant decline. The cell price has dropped by 30% to \$78/kWh, equivalent to approximately 0.56 yuan/Wh in Chinese currency, while the battery pack price has decreased by 20% to \$115/kWh, or 0.805 yuan/Wh.

Why are lithium-ion batteries so expensive in 2025?

In 2025, lithium-ion battery pack prices averaged \$152/kWh, reflecting ongoing challenges, including rising raw material costs and geopolitical tensions, particularly due to Russia's war in Ukraine. These factors have led to high prices for essential metals like lithium and nickel, impacting the production of energy storage technologies.
