

Smart solar Glass Sun Room

Overview

What is photovoltaic smart glass?

Photovoltaic glass, also known as solar glass or transparent solar panels, is a type of smart glass that uses embedded photovoltaic cells to convert sunlight into electricity to generate electricity.

What is transparent photovoltaic smart glass?

Transparent photovoltaic smart glass converts ultraviolet and infrared light into electricity while transmitting visible light into the building interior, allowing for a more sustainable and efficient use of natural light.

What are the benefits of electrochromic smart glass?

All electrical parts are certified for health and safety, and work even in cold climates. Tackle temperature control where unwanted heat loss and gain happens – your windows and glass walls. In the summer, Electrochromic Smart Glass prevents solar heat from getting in, reducing the need for air conditioning.

What is solar glass used for?

Thanks to its versatility, solar glass can be used in a wide variety of construction settings—from residential homes to offices, factories, shopping centers, and more. Some of the most common applications include: These applications are ideal for maximizing solar capture and turning passive structures into active energy generators.

Smart solar Glass Sun Room

Solar Smart Glass

Solar Control Smart Glass combines transparent to opaque switching with IR blocking features for advanced glazing solutions in facades and skylights Gauzy's patented Solar Control LCG (r) Smart Glass turns ...
