

Solar air conditioner placed on the surface in Toronto Canada

Overview

Which Canadian companies install solar air heating systems?

In addition to Beaulieu Canada and Enbridge Consumers Gas, other large Canadian companies have installed solar air heating systems, including Bombardier, at the Canadair facilities in St. Laurent, Quebec, GM of Canada, at the Battery Plant in Oshawa, Ontario, and Ford Canada at their automotive assembly plant in Oakville, Ontario.

How much does a solar AC cost?

We found that the investment in a solar AC generally pays for itself within 10 years of purchase. Angi reports the average homeowner spends \$3,400 on a solar air conditioner. In general, they cost \$1,600-13,000. Mini splits are more affordable, while solar-powered central air conditioners cost more.

Can solar energy be used in air conditioning?

One such application of this renewable energy source is in air conditioning, through solar air conditioners. These heating and cooling appliances can work by using the sun as an energy source. Reduced energy bills and minimal environmental impact are just some of the benefits which this energy source provides.

How does a solar AC work?

In simple terms, solar ACs use solar panels to power the air conditioning system. Solar panels collect energy from the sun. They convert this energy into power. That power either goes directly to the air conditioner or to a battery where it's stored until the AC needs it.
