

# Solar container outdoor power vs Generator

## Overview

---

How do I choose solar power vs a generator?

If you're trying to choose: solar power vs a generator, in the end, your best bet is to choose which one is the best fit for you and your home or business. If you're trying to choose: solar power vs a generator for your home or business, it's best to look at the pros and cons of each of them to discern which is best for your unique needs.

How much does a generator cost?

The average price range for a generator falls between \$3,500 and \$16,000 depending on the size of your home and the size of the generator you choose to power your home. These generators are strong enough to power your entire home during an outage.

What is a solar power battery backup system & a generator?

Two options that may be good for your home and family are a solar power battery backup system and a generator. They both provide backup power in case of an outage, but how they generate this power is very different. Most people are familiar with a generator.

Should you add a battery backup system to a solar panel?

You could choose to add a battery backup system to the solar panel to store excess energy for later. These backup systems are a reliable alternative in case your home suffers a power outage because the system will draw the energy stored in the battery to power your home without any interruptions. They run entirely on renewable energy.
