

Solomon Islands EK PV Panel Project

Overview

Does Solomon have a solar system?

Solomon has natural conditions suitable for solar power, and they are promoting renewable energy, but the grid-connected photovoltaic power generation system (hereinafter referred to as “grid-connected PV system”) has not been introduced.

Why is the power supply in the Solomon Islands so volatile?

Currently, most of the power in the Solomon Islands is dependent on diesel generated power which uses imported fuel. This volatile energy supply structure is susceptible to soaring fuel prices, and the people want it to be rectified as soon as possible.

Is Solomon (Honiara) a good place to install solar panels?

Solomon (Honiara) has about 1.3 times the amount of solar radiation (horizontal plane) than Japan, so the environment is optimal for PV installation. Using the following calculation method, the amount of power generated annually was calculated based on this solar radiation data.

What does Solomon power do?

Solomon Power is the implementing agency for the Solar Power Development Project. They provide personnel for the Project Management Unit (PMU). The PMU, which is within Solomon Power, has been responsible for the procurement of all civil works and goods for the project, in accordance with ADB's Procurement Guidelines.
