

Solomon Islands solar container manufacturer

Overview

How long do solar panels last in Solomon Islands?

The majority of solar energy systems installed in Solomon Islands last less than 2 years due to bad system design and poor user training. Superfly's systems are designed to last a minimum of 5 years (for basic systems) and 10 years for premium systems.

How many solar homes are there in the Solomon Islands?

“Solomon Islands currently has one of the lowest levels of access to electricity in the region, with over 85% of the population of Solomon Islands still without access to electricity and for this project alone, we received over 6,000 applications to obtain only 2,000 solar home systems,” said Mr Aimaea.

Why should you choose a modular solar power container?

Go big with our modular design for easy additional solar power capacity. Customize your container according to various configurations, power outputs, and storage capacity according to your needs. Lower your environmental impact and achieve sustainability objectives by using clean, renewable solar energy.

Where are solar power plants made?

Headquartered in Shanghai with 50,000+ production bases across Jiangsu, Zhejiang, and Guangzhou, the company employs 1,000+ professionals, including 20+ engineers driving energy storage technology. ISO/TUV/CE-certified units deliver rapid-deploy solar power for off-grid, emergency, and mobile applications, reducing emissions by 70% vs diesel.
