

GETON CONTAINERS

South African Solar Container 80kWh

Overview

What is an off-grid container solar system?

An off-grid container solar system requires battery storage that must be designed correctly to generate enough power throughout the year and have the necessary battery capacity to meet the installed location's electrical energy requirements. Containers can offer the advantage of mobility that allows them to be moved to different sites.

What are VAC solar containerised solutions?

The VAC Solar containerised solutions include the required high voltage inverters, LiFePO4 batteries and MCCs (Motor Control Centres) complete with the AC and DC switch gear and protection i.e. circuit breakers, change over switches, fuse protection and SPDs (surge protection devices).

Do you need a back up power source in South Africa?

In the local South African market, there is a need for innovative energy solutions, we are very fortunate with abundant sunshine. An alternative back up power source may be necessary to support your electrical demand and recharge the batteries during times when the batteries are inadequately charged due to unforeseen circumstances.

Who are VAC solar?

VAC Solar specialise in the design, development and construction of containerised solar PV plants. The deployment of containerised PV plants is a fast and convenient method of deploying a new system in remote locations where brick and mortar buildings are not available.
