

# **Stockholm Base Station Communication New Energy Site**

## Overview

---

What is the new electricity connection between Anneberg and Skanstull?

With the new electricity connection between the stations Anneberg and Skanstull we are reinforcing the grid in the Stockholm region. It is part of the project Stockholm Ström designed to meet the region's growing electricity needs.

Why is Stockholm expanding its public transportation capacity?

Stockholm is expanding its public transportation capacity to meet the increasing mobility needs arising from the growth of the population in the Swedish capital over the last years.

What does the Hall substation upgrade mean for Sweden?

This substation upgrade is the foundation for future development and marks a significant milestone in the ongoing efforts to modernize and expand Sweden's power infrastructure. The Hall substation, supplied by Linxon, replaces an aging substation that had reached the end of its operational lifespan.

Why did linxon & Svenska Kraftnät Commission the Hall substation?

The commissioning of the Hall substation is a testament to Linxon's and Svenska kraftnät's dedication to ensuring a robust and resilient power infrastructure for Sweden.

## Stockholm Base Station Communication New Energy Site
