

Stop energy storage projects

Overview

What drives energy storage project development?

Globally, energy storage project development is increasingly driven by the utility-scale segment, with mandates and targeted auctions driving gigawatt-hour projects in markets like China, Saudi Arabia, South Africa, Australia and Chile.

What are China's new energy storage projects?

Recently, multiple new energy storage projects across China have reached important milestones. In Shandong, Xinjiang, Hebei, Qinghai, and Inner Mongolia, several 100-MW-level projects have either started construction or successfully connected to the grid.

Should energy storage be removed from energy grid connection?

For energy storage, the new Chinese policy emphasized the need to remove energy storage as a prerequisite for renewable energy project grid connection, a requirement that has been a major driver for battery build. Nonetheless, BNEF still expects strong demand for batteries, as the policy doesn't explicitly require mandates to stop.

What is the monthly energy storage project analysis?

Since June 2025, the monthly energy storage project analysis has been divided into two sections: "Grid&Source-Side Market" and "User-Side Market". This issue focuses on interpreting the grid&source-side market in October. 1. Dec.4-5 | 2025 China Energy Storage CEO Summit | Xiamen, Fujian Register Now to attend
