

Taipei Photovoltaic Energy Storage Container 10MW

Overview

What is Taipower's new energy storage system?

The new energy storage system adds power for renewable energy! In response to international energy transitions and net-zero emission trends, Taipower is actively developing diverse energy solutions.

How many MW will Taipower have in 2025?

A Taipower representative stated that the government's 2025 goal of establishing 1,500 MW of energy storage includes 500 MW from private developers integrating energy storage with photovoltaic power, 160 MW of energy storage systems built by Taipower, and an additional 1,000 MW from private resources aggregated through the Energy Trading Platform.

Which energy storage system in Taiwan can measure system inertia?

Furthermore, Taipower has introduced Function of Periodic Power Modulation (FPPM) technology at the Dongshan energy storage system, making it the only energy storage system in Taiwan capable of measuring system inertia.

What is the future of energy storage in Taiwan?

Therefore, Taiwan will focus on developing FTM storage, followed by BTM-C&I. InfoLink projects that FTM storage will make up 90% of the energy storage deployment in Taiwan, with solar-plus-storage applications reaching 50%. In terms of economic scale, energy storage market is expected to surpass NTD 10 billion by 2023 and NTD 20 billion by 2026.
