

GETON CONTAINERS

# Target customers of energy storage power stations

## Overview

---

How many electrochemical storage stations are there in 2022?

In 2022, 194 electrochemical storage stations were put into operation, with a total stored energy of 7.9GWh. These accounted for 60.2% of the total energy stored by stations in operation, a year-on-year increase of 176% (Figure 4).

Why are energy storage technologies important?

Energy storage technologies have been recognized as an important component of future power systems due to their capacity for enhancing the electricity grid's flexibility, reliability, and efficiency. They are accepted as a key answer to numerous challenges facing power markets, including decarbonization, price volatility, and supply security.

Is energy storage the future of the power sector?

Energy storage has the potential to play a crucial role in the future of the power sector. However, significant research and development efforts are needed to improve storage technologies, reduce costs, and increase efficiency.

How to promote the implementation of independent energy storage stations?

To promote the implementation of independent energy storage stations, it is necessary to further optimise the electricity market mechanism. segments and targets. Investor participation is beneficial for the development of the energy storage industry.

## Target customers of energy storage power stations

### Global Energy Storage Growth Upheld by New Markets

The global energy storage market is poised to hit new heights yet again in 2025. Despite policy changes and uncertainty in the world's two largest markets, the US and China, ...
