

# **The largest single-cell solar container battery**

## Overview

---

How many large-capacity energy storage cells are there in China?

This year's exhibition saw participation from over 120 Chinese energy storage companies, which unveiled hundreds of new storage products and solutions. Among them were more than 20 large-capacity cells, covering capacities such as 392Ah, 472Ah, 587Ah, and 684Ah.

Are large-capacity storage cells reshaping the energy storage industry?

As the most significant technological advancement in the energy storage industry, large-capacity storage cells are rapidly reshaping every segment of the energy storage supply chain.

What is a containerised energy storage system (BESS)?

They can be configured to match the required power and capacity requirements of client's application. Our containerised energy storage system (BESS) is the perfect solution for large-scale energy storage projects. The energy storage containers can be used in the integration of various storage technologies and for different purposes.

What is intelligent battery cell technology?

In terms of safety and reliability, EVE Energy proposed the intelligent battery cell technology, which employs intelligent high-precision source perception to capture key signals throughout the entire lifecycle of the battery cell in real-time.
