

# **Uninterruptible power supply for Cisco solar container communication stations**

## Overview

---

Why should I care about the Cisco redundant power system 2300?

Cisco Redundant Power System 2300 At-A-Glance Why Should I Care About the Cisco Redundant Power System 2300?

The Cisco Redundant Power System 2300 (Cisco RPS 2300) increases availability of converged data, voice, and video networks. The system delivers power supply redundancy and resiliency for a variety of switch and router power requirements.

Does a Cisco RPS 2300 work if a power supply fails?

Interruption of utility power The Cisco RPS 2300 can address the first two issues. The last issue requires an uninterruptible power supply (UPS). With a single AC circuit, regardless of whether it is from a UPS (Figure 3), the RPS provides protection against a power supply failure for up to two attached devices.

Does Cisco RPS 2300 have a replaceable fan module?

It also has a replaceable fan module. Ease of Use When connected to Cisco Catalyst 3750-E and 3560-E Series Switches, the Cisco RPS 2300 offers enhanced capabilities to manage power supply redundancy, including remotely placing the RPS or any of the six individual DC ports in active or standby mode. The default failover behavior.

How many ports can a C3K-PWR-1150WAC back up?

At least 1 power supply, either a C3K-PWR-1150WAC that can back up 48 ports of Class 3 (15.4W) PoE or a C3K-PWR-750WAC that can back up 24 ports of Class 3 (15.4W) PoE or 48 ports of Class 2 (7W) PoE. One power cable is included for every power supply ordered.

## Uninterruptible power supply for Cisco solar container communication

### [Commercial use of solar container batteries for ...](#)

Uninterrupted power supply for photovoltaic 5g communication base stations Base station operators deploy a large number of distributed photovoltaics to solve the problems of high ...
