# **Usb c power station in China in Moscow**

## Overview

---

Does Russia have a voltage converter?

Keep in mind that some electronic devices (e.g., smartphones, laptops, and cameras) have built-in voltage converters, allowing them to work with a range of voltages in Russia and beyond. Always use a surge protector when charging your devices in Russia to prevent damage from power fluctuations.

Do I need a power adapter in Russia?

However, if your devices use a different plug type or are not compatible with the voltage in Russia, you will need a power adapter and/or a voltage converter/transformer. The standard voltage in Russia is 220 V, and the standard frequency is 50 Hz.

What plugs are used in Russia?

We've got you covered with this comprehensive guide on electricity in Russia to ensure all of your electronic devices stay fully charged and functional during your stay. Plugs for Russia are: Type C: also known as the Europlug, is a two-pin plug commonly used in most European countries, as well as in parts of Asia and Africa.

Should I use a surge protector when charging my devices in Russia?

Always use a surge protector when charging your devices in Russia to prevent damage from power fluctuations. When in Russia, avoid using high-wattage devices (e.g., hair dryers, curling irons, and straighteners) without a proper voltage converter, as they can cause damage to your devices or the electrical system.
