Will solar power boost Vanuatu's energy independence and climate resilience?

The project aims to support the use of solar power and battery storage on the islands of Efate and Tanna, boosting Vanuatu's energy independence and climate resilience. New Zealand's Deputy Prime Minister and Minister for Foreign Affairs, Winston Peters, confirmed the country's commitment during a press conference held in Port Vila on Wednesday.

How does electricity work in Vanuatu?

In Vanuatu's main urban centers of Port Vila and Luganville, electricity is delivered through grids, which distribute electricity generated at power plants to homes and businesses using power lines and underground cables. Some areas on the islands of Tanna and Malekula also have limited access to grid electricity.

Will New Zealand help build resilience in Vanuatu?

We are pleased to announce that New Zealand will also be the lead donor to RESSET, a renewable energy project on Efate and Tanna. Together with initiatives like these, we continue to work together to build resilience in Vanuatu's long-term development," Mr. Peters said.
