# What are the electricity base stations in Saudi Arabia

## Overview

---

When did electricity start in Saudi Arabia?

Electricity in the Kingdom of Saudi Arabia began in 1907 with two generators powered by coal and kerosene. Over the following decades, it evolved, leading the Kingdom into the era of renewable energy projects.

How much electricity does Saudi Arabia produce?

Electricity production in the Kingdom jumped from twenty KW in 1907, the first electricity produced in the Kingdom, to around 290.000.000.00 KW, which the Saudi Electricity Company sold in 2018. The company also succeeded in providing electricity to 13,112 cities, villages, and hamlets spread across the Kingdom's vast area.

What is Saudi Electricity Company?

Saudi Electricity Company plays a vital role by supplying the Kingdom with energy according to the highest reliability standards. The company is considered the primary source of electricity in the Kingdom by producing, transmitting, and distributing electricity through an extensive network covering all parts of the country.

What is the organizational structure of Saudi Electricity Company?

In 2002, the Board of Directors of Saudi Electricity Company approved a new phased organizational structure designed based on specialized activities, which include strategic work units: generation, transmission, distribution, and shared activities and support services.
