

# **What are the household energy storage batteries in Somalia**

## Overview

---

What kind of energy is used in Somalia?

Domestic use of energy: Most Somali households use fossil fuels such as charcoal and firewood for household cooking. Charcoal (47.9 percent) and firewood (41.3 percent) are the two energy sources most used for cooking, while gas or electricity are only minimally used.

How many people in Somalia have access to electricity?

While variations exist between rural and urban areas, in 2023 the Somali Household Budget survey estimated more than half of the population (61.9 percent) had access to electricity, demonstrating progress on the expansion of electricity services in the country.

How much does electricity cost in Somalia?

Regarding costs per kilowatt-hour of electricity, Somalia has one of the highest unit prices in Africa. Somalia has higher tariffs than neighboring countries Kenya and Ethiopia, ranging from 50-125 cents/kWh compared to 0.15 cents/kWh in Kenya and 0.6 cents/kWh in Ethiopia. Somalia's energy sector is considered promising for growth and investment.

Who generates electricity in Somalia?

Small and medium-sized private sector companies are the main providers of electricity generation and distribution, primarily running diesel powered systems through off-grid networks. Private Somali companies generate approximately 128MW; most companies generate and distribute electricity independently.
