What is the size of Kathmandu's double-glass solar curtain wall

Overview

What is a glass curtain wall system?

The glass curtain wall systems are a symbol of modern architecture, dating back to the 1930's construction era. Rising the adoption of aluminum as a lightweight and structurally strong alternative to iron has put a significant impact on the development and adoption of glass curtain wall systems as an integral element of the building structure.

What are the different types of glass curtain wall?

There are 2 main categories of glass curtain wall if we look at their fabrication and installation methods: stick systems and unitized (or modular) systems. A frame is assembled on-site using mullions, transoms, and glass or opaque panels (potentially glass spandrels), which are designed to fit together as a unitized system.

What is the demand for unitized glass curtain walls?

The unitized system led the market for glass curtain walls and accounted for more than 65.0% share of the global revenue in 2019. The demand for unitized system is driven by its easy to install properly and its suitability to the high rise building structures.

What is the market share of glass curtain walls?

The commercial end-use segment led the market for glass curtain walls and accounted for more than 70.0% of the global revenue share in 2019, owing to the growing emphasis on the construction of energy-efficient office spaces and commercial structures.

What is the size of Kathmandu's double-glass solar curtain wall

Glass curtain wall system

The curtain wall method of glazing enables glass to be used in large, uninterrupted areas of a building envelope, creating consistent, attractive facades. The variety of glass products ...
