# **What is the size of the c20 battery cabinet**

## Overview

---

What is a C20 battery?

**C20 (20-Hour Discharge Rate):** This is the least demanding discharge rate. A C20 rating means the battery is discharged completely in 20 hours. Example: A 150 Ah battery with a C20 rating can deliver 7.5 A for 20 hours. Use Case: Suitable for low-power, long-duration applications like emergency lighting or small-scale renewable energy systems.

What is the C20 rating of a battery?

To get a ballpark idea of the C20 rating of a battery, divide the CCA by 20. Example: A 1000CCA battery is roughly equivalent to a 50Ah battery. The C rating of a battery is the power capacity of a battery. Typically this is followed by a number (C100, C20, C10 or C5) indicating the number of hours this power must be spread across.

What does C1 C10 & C20 mean?

In battery technology, C1, C10, and C20 are terms used to describe the discharge rate of a battery. One can describe it as battery capacity based on the C rating as the battery capacity will vary with the variation of load applied on the battery.

What does a C20 rating mean?

A C20 rating means the battery is discharged completely in 20 hours. Example: A 150 Ah battery with a C20 rating can deliver 7.5 A for 20 hours. Use Case: Suitable for low-power, long-duration applications like emergency lighting or small-scale renewable energy systems. How to Check the Difference Between C1, C10, and C20 1.
