

Where are the power signal base stations in Nicosia

Overview

What is the history of electricity in Cyprus?

The small Mediterranean Island of Cyprus has been enjoying the benefits of electricity for over 90 years. The new source of energy was first introduced in 1903 with the installation, by the then British colonial government, of a power generator to serve the needs of the Commission in the capital, Nicosia.

When was the first generator installed in Nicosia?

The new source of energy was first introduced in 1903 with the installation, by the then British colonial government, of a power generator to serve the needs of the Commission in the capital, Nicosia. This was followed shortly afterwards by the installation of a second generator at the Nicosia General Hospital.

How much solar energy does Cyprus have?

Cyprus is also characterized by an abundant solar energy resource across the whole year: the average global solar can reach 2000 kWh/m². Wind energy is instead quite limited over the island of Cyprus, with an annual average wind speed below 4 m/s in the majority of areas.

What is the name of the Electric Light Company in Limassol?

The company was called Electrofotistiki Eteria Lemessou (The Limassol Electric Light Company). George Pierides, a powerful figure in the economic life of the capital, formed the Nicosia Electricity Company the following year, in 1913. Naturally, within the course of a few years, all other towns followed suit.
